

BIODATA

MSc. Nguyen Thanh Trung, head of Laboratory of Food Microbiology and Genetically Modified Food, National Institute for Food Control. He achieved a Master's degree in Biology at VNU University of Science in 2014. He is an expert in microbiology and toxicity as well. He works with a variety of microorganisms, builds procedures and guidelines for the Microbiological laboratory, implements testing of pathogenic bacteria such as *Salmonella* spp., *Staphylococcus aureus*, and identifies the cause of food poisoning. He continues to study Doctorate program in Biology with his thesis focusing on molecular biology and antibiotic-resistance profile of *Salmonella* in poultry. Furthermore, his research was published by national and international journals.
