

Biography

Full name, Title: Assoc. Prof. Lee Joon-Goo

Position: Associate Professor

Affiliation: Seoul National University of Science and Technology

Professor Joon-Goo Lee is a professor in the Department of Food Science and Biotechnology at Seoul National University of Science and Technology. His academic specialization is food hygiene and safety, with a particular focus on the assessment and management of chemical hazards in food. He received his Ph.D. from Seoul National University. Before joining Seoul National University of Science and Technology, Professor Lee worked as a scientific officer at the Ministry of Food and Drug Safety of Korea for approximately 15 years, where he contributed to research and regulatory activities related to food safety.

In addition to his academic and research activities in Korea, Professor Lee has broadened his international experience through his work as a visiting scientist in FSANZ and NMI in Australia, where he engaged in collaborative research and academic exchange in the field of food safety. He has also actively participated in a wide range of domestic and international academic societies and professional organizations, serving in various roles including committee member, expert, and contributor to conferences and scientific activities

His research interests include the toxicity and risk assessment of hazardous chemicals in food, the reduction of chemical contaminants generated during food processing and manufacturing, dietary exposure assessment through total diet studies, and regulatory science in food safety. He has published numerous research papers on food contaminants, analytical methods, toxicity, and risk assessment in international journals. His recent research includes studies on polycyclic aromatic hydrocarbons, benzotriazole ultraviolet stabilizers, chlorinated compounds, and other chemical contaminants in food.
