

Dr. Lingkai Wong is a Senior Scientist in the Analytical Research team at Abbott Nutrition R&D, Pacific Asia. He obtained his Ph.D. in Medicinal Chemistry from the National University of Singapore and has over 20 years of research experience in organic synthesis, medicinal chemistry, analytical chemistry, and method development. Prior to joining Abbott, he worked at the Health Sciences Authority Singapore, where he developed reference methods and certified reference materials, and at GSK Vaccines, where he supported analytical method validation and quality control activities. His current research focuses on analytical solutions for novel ingredients and nutritional products.
