

Biography

Full name, Title: Dr. Vu Thi Trang

Position: Head of laboratory of Nutrients and Food Additives

Affiliation: National Institute for Food Control

Dr. Trang Vu received her Ph.D. in Chemistry, with a specialization in Analytical Chemistry, from the University of Science, Vietnam National University, Hanoi, Vietnam, in 2020. She is currently Head of the Laboratory of Nutrients and Food Additives at the National Institute for Food Control (NIFC), Vietnam. She has 19 years of professional experience in food quality and safety testing, with extensive expertise in the development and application of advanced analytical methods for food quality control, authenticity, and safety assessment.

Her research interests primarily focus on the development, validation, and application of analytical methods for food quality and safety; evaluation of product stability and shelf life; assessment of the effects, functions, and efficacy of food and related products; and food safety risk assessment.

Throughout her professional and research career, Dr. Vu Thi Trang has served as principal investigator and project secretary for four national, ministerial, and municipal research projects, and as principal investigator for 12 institutional-level research projects. She has contributed to the development of more than 60 Vietnam National Standards (TCVN) in the field of food analysis and testing and has co-authored six specialized books. She has also published numerous research articles in international and national peer-reviewed journals.
